About Me

I'm a passionate Flutter and Python developer with hands-on experience building full-stack apps. I love working on real-world projects involving FastAPI, SQLite, Hive, and Firebase. Currently pursuing a BS in Cybersecurity, I enjoy exploring modern tech stacks that combine frontend and backend efficiency.

Technical Skills

- Flutter (BLoC, Provider, Riverpod, Clean Architecture)
- FastAPI & RESTful APIs
- Hive, SQLite, Firebase, Cloud Firestore
- Python (OOP, decorators, PDF operations, JSON, automation)
- UI/UX Design, Theme Customization, and App Deployment
- Git & GitHub, Linux Basics, and CLI scripting

Highlighted Projects

- **Smart Expense Manager**: A complete expense tracker app built using Flutter, Hive, and FastAPI backend.
- **AI Chat App**: A real-time AI chatbot built using Flutter and OpenAI API integration with Hive messaging.
- **Daily Expense Tracker**: Flutter app using Hive and Provider for managing daily expenses grouped by category.
- **FastAPI E-Commerce Backend**: Developed REST APIs for product listing, user authentication, and order management.

Thank you for reviewing my CV!
